EDUCATION & TRAINING

DevMountain

Web Development

- November 2018 - February 2019

University of North Texas

Bachelor of Fine Arts in Studio Art

- August 2008 - December 2011

RECENT PROJECTS

ALL.4.G. *February 2019*

github.com/gamers-unite/All-4-G

Technologies Used: React, Javascript, Node.js, Redux, Express, PostgreSQL, MaterialUI, Firebase Storage

Description:

- A group project built for gamers to connect with others online and form parties for specific games
- Created the login and register components and handled authentication
- Built out the backend and set up database tables
- Self taught React hooks, which were then used in almost every component in the app

FosterPet *January 2019*

fosterpet.us | <https://github.com/laurajinks/foster-pet>

Technologies Used: React, Javascript, Node.js, Redux, Express, PostgreSQL, Sass, Firebase Storage

Description:

- A personal project built to connect foster organizations and volunteers
- Created both organization and individual accounts, using bcryptjs for authentication
- Connected the Petfinder API to pull lists of adoptable animals
- Made fully mobile-responsive using Sass

Gaming Queue *December 2018*

github.com/laurajinks/game-queue

Technologies Used: React, Javascript, Node.js, Express, PostgreSQL

Description:

- A personal project built to be able to store a list of video games the user wants to play with notes about each game, in addition to keeping track of past games played
- Connected to the Giant Bomb API to allow users to search for games and add them to their list

WORK EXPERIENCE

Gynx Yarns

Owner, Artist | April 2011 - October 2018

- Designed and dyed custom yarn for both yarn shops and individual clients
- Communicated directly with clients to plan projects and assist in color selection
- Utilized time management skills to set my own schedule
